TECHNOLOGIES

- Programming Languages: Python, C, Java, SQL
- AI/ML Frameworks: PyTorch, Keras, NumPy, MLflow
- Web & Frontend: HTML/CSS/JS, React/MERN, Angular, Next.js, Three.js
- Backend & Databases: Node.js, PHP (Laravel), MySQL, Oracle, Socket.IO
- DevOps & MLOps: Docker, Kubernetes, Airflow, GitHub Actions, n8n
- Design & Modeling: UML, Figma

SOFT SKILLS

- Leadership & Team Management
- Creative Problem-Solving
- Effective Communication

LANGUAGES

English (Fluent)
French (Fluent)
Arabic (Native)

ABOUT ME

Second year master's student in Artificial Intelligence and Digital Computing at FST Beni Mellal, "Focused on applying AI, MLOps, and Big Data to real-world problems. Seeking an internship to deliver impactful solutions while growing as an engineer.

EDUCATIONAL PATHWAY

Science Math B (French Language Option)

2020-2021

FST SETTAT - BENI MELLAL

2021 - Now

- "DEUST " in MIP (Mathematics, Informatics, Physics)
- Bachelor's Degree in Computer Science Engineering
- Pursuing a Master's in Artificial Intelligence and Data Science (AIDC) at FST Beni Mellal. Currently completing the AWS Academy Machine Learning Foundations certification
- Generative AI Course With Langchain and Huggingface .

PERSONAL PROJECT:

- My personal portfolio using MERN Stack technologies , with a chatapp
- Application for scanning invoices and bank statements with OCR for my Bachelor's final year project at ABN SOFT (a software company based in Casablanca , Morocco)
- Built a Kafka pipeline to stream, process, and visualize live aircraft data, enabling real-time monitoring and anomaly detection .
- Developed an IoT-integrated LSTM model to predict rainfall in Morocco, leveraging real-time sensor data (temperature, humidity, soil moisture) to optimize irrigation and water resource management.
- "Reimplemented the CViT architecture combining CNN feature extraction with Vision Transformers for digit classification, achieving improved accuracy and robustness compared to standard CNN/ViT baselines.
- Applied CNNs (ResNet-50 + transfer learning) for diabetic retinopathy detection, improving image clarity and classification accuracy

HOBBIES AND INTERESTS

- Travel
- Gaming
- Coding
- Sports Activities
- Professional Development
- Outdoor Adventure
